

RGMM Norton Ltd

Exploded view of MK3 Commando starter motor drive train. Prices are correct as at today's date (26.03.2017). Prices may change. If you wish to check latest prices please visit our Website WWW.RGMMOTORS.CO.UK. The prices shown on the Website are always correct. Please note all prices shown are plus VAT if applicable.

We also stock many parts for the original prestolite starter motor including four brush conversions for more power. To view these spares simply enter starter in the search box and all will appear however if major work or a complete New starter is required then we would recommend upgrading to the new high output starter 064791B. This will work better and if there is a full refurbishment required on your original starter also work out cheaper.
